Subject: Application for getting permission to continue M.tech.

Respected sir,

I Gaurav Paliwal pursuing M.tech (Design) with roll no: 1510319 want to request you to please allow me to continue my MTECH. Having not performed well in MTECH 1st year my CPI is 6.2. I admit it's my fault. It was very tough for me to switch from a college of I.P university (closed two years ago) to PDPM IIITDMJ. It was difficult for me to cope up with advanced syllabus, reading research papers and doing project work which I had never done before. I got nervous in the beginning thus I could not perform well. But now I have started understanding the things properly and I think I can improve my CPI. If given a chance I will definitely improve my grades by opting courses in which I could not perform well during my course work.

Sir I kindly request you to please consider my application and give me a chance so that I can continue my M.Tech from this institute.

With regards,

Gaurav Paliwal

SUB:- Plea against Course drop.

Respected Sir,

I, Anoop Kumar Singh, Student of M.Des., Roll. No. 1510402, had received a letter of course drop from Respected Institute, day before yesterday i.e. 26/07/2016. The reason for receiving the letter is of getting low CPI/SPI below mark.

I want to make the plea against the decision. The main reason behind my this poor performance is physical illness and mental pressure. Sir, I am not a regular bad performer. As I had scored 7.2 CPI/SPI in my first semester, which shows that I am not at all the bad performer. Also I had helped my batch mates in making prototypes. Because of the above mentioned reasons, I was not able to perform ~~ago~~ upto my potential. I you give me another chance, I will prove my potential and this poor performance will not appear on my score again.

I would be highly obliged for your
act of kindness.

Thanking you,

Your obedient,

Anoop Kumar Singh

M. Des Ind yr.

Sub :- Appeal for M.Tech.

Respected Sir,

I am ~~A~~ Anirash Khanna, student of M.Tech, CAD-CAM branch of 2015-17 batch. I have got termination letter and want to appeal for the continuation of M.Tech. This termination is ~~due~~ ^{caused} by my poor performance in the II semester examination, which results in a CPI of 4.9 and this lowered my SPI to 6.0. In the II semester, I was having family problems which arise due to the death of Grandfather in December. Due to this problem and settlement of this problem, I have to ~~go~~ go again and again to my home. I am not having any leave record because I used to go at weekends. This problem cause me mental stress and I was not ~~be~~ able to focus on my studies. This was the reason for my poor performance.

Sir I am from a private college of Indore. I have a ~~age~~ aggregate of 70.5% in my B.E. After B.E, I appear in GATE and score 597 with AIR 6539 which is quiet good. By this score I got admission in IIIT college. In the I semester, it was very difficult to cope-up ~~to~~ with the change of study pattern and environment, but I struggled and score a CPI of 7.1 in I first semester.

Sir I am a good performer and a good student and dont want this small problems to ruin my career.

~~is~~

So, kindly look into this matter and do some
~~useful~~ mercy and give me one more chance to prove myself.
and I assure you I will improve my grade in the coming semesters.

Thanking You

Yours Faithfully

Avinash Khanna

Sub: Regarding appeal for Mtech against termination.

Respected Sir,

I am R.RUBAN student of Mtech CAD/CAM. I have not performed well in the previous two semesters and my overall C.P.I is 6.0 and 6.4 respectively and that has prompted my termination.

The reason behind my poor performance is my father`s health condition. He had a severe heart problem infact he underwent through a bypass surgery in March 2016. I had been under mental trauma through these period and would not focus on my study. I can submit the medical report if and when required.

Sir, As my father condition has improved. I assure you that I will perform well in coming semesters.

So, Please cancel my termination and allow to complete my M tech.

Yours obediently,

R.RUBAN
